MARFILPE PORTUGAL

Quarries and stone processing

MARFILPE

FACADE TECHNOLOGY

For more than 30 years, our company has owned the largest quarries for the extraction of Portuguese facade limestones such as moleanos, crema moca, azul monica, moleanos azul.

The company's warehouses always have a large block in order to be able to quickly begin fulfilling the order.

MARFILPE

FACADE TECHNOLOGY

Product quality is the basis of our production. All products and tiles undergo additional quality control before being sent to customers to eliminate any possible deviations in thickness or overall dimensions.

The production capacity of our modern stone processing plant, located close to the quarry, allows us to produce 5,000 m²/sq.m of products of the highest quality monthly.

MARFILPE

FACADE TECHNOLOGY

FILIPE MIGUEL

CEO Marfilpe

Quality and deadlines are our priorities for our clients.

ARMINDO SOUSA

Chef of fabrica

The best advertisement for any product is its quality.

Every year our company takes part in the most significant events in the world of natural stone mining and processing.
